JIC/AN SAE Flare Male Tube Union

Our Stainless Steel JIC Adapters are crafted from premium 316L stainless steel, known for its enhanced corrosion resistance, high tensile strength, and temperature resilience. This makes them ideal for high-pressure applications in corrosive and high-temperature environments. Easy to maintain and non-reactive to chemicals, these adapters offer longevity and reliability. Compatible with JIC, NPT, and NPSM thread types, they meet industry specifications for secure and consistent connections.

Material: 316L Stainless Steel

Shaping: Forged

Standards: ASME B1.20.1, SAE AS71051
